Model NO.: P-51BL

Main Features:

- 3 x 4 IP65 dot matrix keypad, 10 numbers, 2 function keys
- Zinc alloy chromed frame and zinc alloy key buttons, backlit keys, vandal resistant, with good casting performance, complex die-cast shapes can be made, and the casting surface is very smooth
- The layout can be customized upon customer's request
- Backlit colors are optional, like blue, white, green and red etc.
- Weatherproof, corrosion resistance, aging resistance
- Chemical gold plated and reliable contact
- LED voltage: 2.8V for the blue backlit, 9V for the white backlit
- Switch life: more than 10 million of operations
- Operating temperature:-30℃ ～+70℃
- Storage temperature: -40℃ ～ +80 ℃
- Front panel dimension: 56 x 72.0mm
- Gross Weight: 0.4kg
- CE, FCC, RoHS compliance

Applications:

It can be used in access control system, security system, public telephone system, digital lock systems, cabinet security, public service, ATM, self-service terminal, vending machine etc..
